2 Another Section

3 The End

Level 1 Heading = Section

Level 2 Heading = Slide

This file, `template.md`, contains an example of how to use markdown to:

- create a slide
- create a section
- create a list
- create column layout
- create boxes
- create syntax-highlighted code
- include a picture
- center a line of text
- specify incremental reveal

The theme settings are all in the file `template.theme`.

Another Section

A Slide About Emphasis

Bold text

Italic text

~~Strikethrough text~~

Centered text

Alert text

This here is a block quote. The quick brown fox jumped over the lazy dog. The quick brown fox jumped over the lazy dog. The quick brown fox jumped over the lazy dog. The quick brown fox jumped over the lazy dog. The quick brown fox jumped over the lazy dog.

Another level

Level 3 Heading = Box

Here's a numbered list:

- 1 First item
- 2 Next item

Level ≥ 4 Heading = Nested Box

Rarely seen.

Code with Syntax Highlighting

① Python code:

```
s="some text"  
print(s)
```

② R code:

```
a <- c(1,2)  
print(a)
```

Pictures

One with a caption:

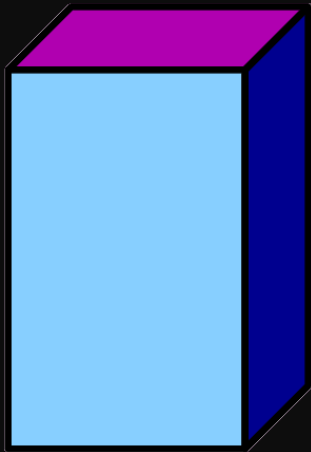

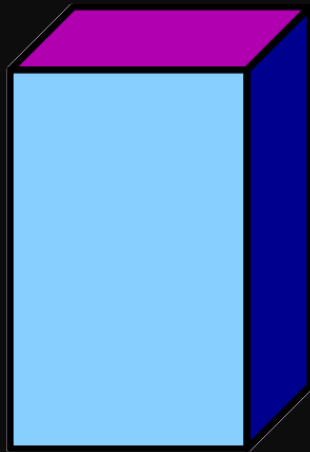

Figure 1: A caption

One without a caption:

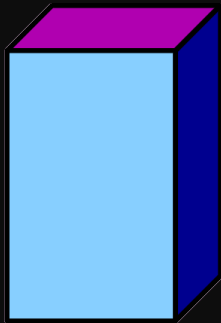

Columns

Left column

Columns cannot be nested, but otherwise they can still contain other markdown.

Middle column

This contains an image

Right column

This one contains some C code:

```
int main()
{
    return 0;
}
```

Did you notice the pauses between the columns?

A Table

Column header 1	Column header 2	Column header 3
A	B	C
D	E	F

Link

Where is the slide with the title [a table](#)?

Link to a site like <https://www.google.com>.

Link with a different text: [bla bla](#).
